**RE: CRYSTAL SPRINGS REGIONAL TRAIL SOUTH OF DAM PROJECT**

Dear Chairman Bosco:

I am writing to you in support of the San Mateo County Parks' Division application for grant funding for the Crystal Springs Regional Trail South of Dam Project. A grant of \$250,000 will match California State Park and California Department of Transportation grant funds to fully underwrite the project construction.

The Project will support public access by walkers, joggers, hikers, equestrians, and cyclists on a 0.8-mile long ADA-accessible trail segment that will help fill a 2.5-mile gap in the planned seventeen mile alignment of Crystal Springs Trail in the mid-coast of San Mateo County.

Over 325,000 visitors use existing sections of Crystal Springs Regional Trail annually. This extremely popular trail is used as a commute and recreation corridor as well as for nature study and appreciation of the views in the San Francisco Peninsula Watershed.

The existing trail is one of California's most significant regional resources that is accessible to a broad range of visitors. The trail is a truly magnificent recreational resource that both protects and provides access to a watershed of unparalleled beauty.

I thank you for your attention to this matter. If I or my office may be of any additional assistance, please do not hesitate to contact my District Director, David Burruto, at (650) 340-8840.

**RECEIVED**

APR 11 2011

COASTAL CONSERVANCY

Douglas Bosco, Chairman  
California State Coastal Conservancy  
1330 Broadway, 13th Floor  
Oakland, CA 94612-2530

Dear Mr. Bosco:

I write to express my support for San Mateo County Division of Park's \$250,000 grant application for construction of the 4,800-foot-long Crystal Springs Regional Trail South of Dam Trail Project. The Project supports the Division's long term vision for completing the entire seventeen mile alignment of the Crystal Springs Regional Trail amidst the San Francisco Peninsula Watershed from the City of San Bruno to the City of Woodside.

With numerous trailheads near residential areas and national, state, regional and city parks, this trail supports visitation by more than 325,000 people each year. These users will benefit from an additional 0.9 miles of Class I Bikeway for their commuting or recreational needs. The 10-foot-wide paved ADA-accessible trail and two-foot-wide gravel shoulders will accommodate walkers, joggers, cyclists, equestrians, inline skaters or stroller pushers.

Thank you for your consideration of this project.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard S. Gordon".

RE: CRYSTAL SPRINGS REGIONAL TRAIL SOUTH OF DAM PROJECT

Dear Mr. Bosco:

I write in support of the request of San Mateo County for a \$250,000 grant for construction of the Crystal Springs Regional Trail South of Dam Project (the "Project"). This request is on the July 21, 2011 California State Coastal Conservancy board agenda. The grant request if fully funded would provide the final funding needed to fully underwrite project construction.

The Project will convert an existing San Francisco Public Utilities Commission Peninsula Watershed service road into a 0.8-mile-long multiple-use, fully ADA-accessible trail supported by a restroom, rules and regulatory signs, trash and recycling receptacles and park kiosk.

The Project will support public access by walkers, joggers, hikers, equestrians, and cyclists and will help fill a 2.5-mile gap in the planned seventeen mile alignment of Crystal Springs Trail in mid-coast San Mateo County.

Over 325,000 visitors use existing sections of Crystal Springs Regional Trail annually. This extremely popular trail is used as a commute and recreation corridor as well as for nature study and appreciation of the views in the San Francisco Peninsula Watershed.

Please do not hesitate to contact me if you have any questions.

Sincerely,

Jerry Hill

Re: San Mateo County Department of Parks' Crystal Springs  
Regional Trail South of Dam Section Application

Dear Mr. Bosco,

The San Mateo County Parks Foundation, with a membership of over 3,000 families, strongly supports the San Mateo County Department of Parks' grant application for the Crystal Springs Regional Trail South of Dam Section. The extension of this popular trail is highly desired by the community as evidenced by the frequent calls to my office or inquiries at public tabling events asking when the section will be open.

The existing segments of the Crystal Springs Regional Trail are very popular with a variety of trail users such as walkers and hikers of all ages and abilities, both recreational and commuting bicyclists, equestrians and inline skaters.

Because of the trail's heavy use and its popularity with senior citizens and those with children, the trail needs to meet Class I standards and amenities such as restrooms, benches, information kiosks and trash cans are important.

The extension of this segment of the trail does more than provide additional recreational opportunities. It furthers initiatives supported by the County to provide additional commute options and opportunities for people to exercise and improve their health.

Thank you for your consideration.

Sincerely

  
Julia Bott  
Executive Director
